The Geyer Agency Is Here for You

Providing crop insurance coverage and outstanding service is the sole focus of The Roland L. Geyer Agency. While other agents diversify their offerings, we give our time and energy to the specialized and unique business of crop insurance so we can give our customers the best service possible. We maintain a commitment to representing your best interests, including serving multiple generations of families who raise crops in the most productive part of the world.

Have questions about crop insurance? You are always welcome at our office. And we are glad to visit you at your farm if you wish. Call us at 712-662-7500 or toll free at 800-253-4012. You can also email us at tgeyer412@outlook.com. Tod's cell phone number is 712-574-2544 and Phil's 712-830-3035.

Thank you for your business and trust in us to cover your acres and your livelihood.

Reminder: Submit Your 2024 Yield Data

Thanks to all who have submitted their 2024 yield results! Reports received so far indicate yield variability for our clients, as expected from our wet spring and dry late summer.

Yield reports are essential for our records, required for your coverage, and important data we have available to you when needed for Farm Bill processes.

To get your yield reports to The Geyer Agency, call us at 712-662-7500 or email your yield information to tgeyer412@outlook.com. We do everything we can to make the process quick and convenient!

Farm Business Changes Important for Coverage

Please let The Roland L. Geyer Agency know about any farm business changes for your enterprise. For your coverage to be its most effective, it is essential you share the following information with us:

- Additional or reduced acreage
- Changes to crop share agreements
- Change in marital status

We need the most current and accurate information about your farm business, including changes, for you to receive the maximum effectiveness and validity for your

crop insurance policies. This will help protect your future by developing the best and most appropriate coverage for you.

It's our pleasure to review your present crop insurance coverage with you and provide information for making decisions for the coming growing season. From coverage needs to planting intentions to changes to your farm business as they impact crop insurance coverage, we can help you develop the best coverage plan possible.

Coverage Options in 2025

Because crop insurers update their coverage annually, the team at The Roland L. Geyer Agency performs internal review of coverage and attends training as well to have the most current information for our customers.

You can count on Tod and Phil to inform you about how these policies, including several supplemental products made available by crop insurers, could work for your farm enterprise. Our review and training give us understanding of the value of policies to our customers and we are prepared to discuss them for your benefit.

ECO, or Enhanced Coverage Option, coverage was updated for 2025. While the government did increase their portion of the premium cost, it was at a level lower than expected. ECO remains a very specialized coverage for some farmers, and we can help you understand how it might work for you.

Contact us and we will be happy to discuss your 2025 coverage needs with you.

Ask Us About Hail Coverage

Whether it's hail or another weather-related event creating the need, The Geyer Agency can help design coverage giving you tools to survive these challenges without lost income. Every growing season has different weather patterns and some of them can damage your crops. The Geyer Agency can offer protection from loss. Ask us how you can implement this coverage to avoid devastating losses.

2024: Really Wet then Really Dry

Yield results reported to The Geyer Agency so far have been variable, as expected. While farmers north of our trade territory are keeping adjusters busy with their claims, we are fortunate there wasn't widespread crop loss in our area. The Geyer Agency continues to work with our customers who did have claims from 2024. Whether few or many, it is our priority to process every claim quickly and accurately. We work to see claims settled as soon as possible.

The one-year extension of the Farm Bill means no changes to present programs. However, crop insurance is regulated by separate legislation, the Federal Crop Insurance Act of 1938, giving us a basis to work from with you.

We are honored to serve you, and we look forward to continuing our successful relationship next growing season and beyond.
